

# Middle Georgia – Robins Air Force Base Sustainability Plan

## **WHAT IS A SUSTAINABILITY PLAN?**

A Sustainability Plan is a collaborative study conducted by the regional commission, the military installation, local municipalities, federal officials, and residents to identify compatible land uses and growth management guidelines near the installation. The process encourages the local community and the installation to act as a team in order to prevent or limit any encroachment issues caused by future mission expansion or local growth.

## **WE NEED YOUR HELP!**

The community plays a crucial role in the drafting of the plan. Community input provides varying perspectives and differing opinions to ensure that the plan is well rounded and reflects the community. To effectively gather input, a variety of public engagement opportunities have been used during the drafting of the sustainability plan, including a project website ([www.robinsafbsp.com](http://www.robinsafbsp.com)), stakeholder interviews, a community survey, and public meetings.
